The United Nations Convention on the Rights of the Child

Climate Education: The importance of giving children and young people a voice

UNESCO and education for transformation

“We must change the way we think and act as individuals and societies. So, in turn, education must change to create a peaceful and sustainable world for the survival and prosperity of current and future generations”

Stefania Giannini, Assistant Director-General for Education,
UNESCO, 2020

Climate Change and Girls' Education

Climate Change and Girls' Education: Why important?

- Girls' vulnerability to the impacts of climate change:
 - Generally
 - In relation to their education
- The importance of girls' education for addressing climate change
 - Sexual and reproductive health rights
 - Green skills for changing world of work
 - Environmental leadership

Voices of children and young people: Manifesto for Education for Environmental Sustainability

- Aimed to elicit a shared vision of what the future of education for environmental sustainability could look like.
- Working towards a **manifesto**.
- Foregrounding voices of hard-to-reach communities.
- Online participatory workshops between teachers and young people:
 - Futures workshops;
 - Visualisation workshops.

Values we share

- Love for each other & the planet
- Respect & compassion for others
- Honesty, humility & cooperation
- Social justice
- Equitable opportunities for all
- Connection with nature
- Wisdom
- Positivity
- Adaptability
- Practicality and pragmatism

Capabilities we need

- Knowledge for action
- Critical thinking
- Questioning
- Data literacy
- Research
- Innovation
- Creativity
- Communication
- Networking

Classroom Solutions

Resource teachers of all subjects to engage in sustainability focused professional development to develop confidence.

Use more sustainable resources and practices across both the curriculum and extra and co-curricular contexts

Provide students with the space and time to learn about climate change and environmental sustainability that is not linked to assessment.

Encourage students to research and take action on sustainability.

SCHOOL SOLUTIONS

Identify ways to feature sustainability in school-level decision making bodies and policies.

Consider environmental sustainability in all purchasing decisions. Track and reward sustainability actions.

Acknowledge and nurture the link between the quality of the school environment and mental and physical health.

Appoint and empower a school sustainability lead.

Place student voice and agency at the core of school sustainability action.

Make the sustainable choice the convenient choice in school.

Green the school environment and create opportunities for teachers and students to learn to grow food and other plants.

COMMUNITY SOLUTIONS

Value schools as local hubs for sustainability where people from across the community can take part in and lead education and activities, and build networks.

Start young and keep going! Identify and value sustainability education undertaken from the early years onwards and build on this work through community-based partnerships in both formal and informal settings.

Create no-cost, external, accredited awards for students and teachers which have an environmental sustainability focus.

Develop a community 'sustainability curriculum' for groups and parents involved in education.

Policy Solutions

Enlist the endorsement of respected 'entities' (politicians, social media influencers).

- Identify ways that sustainability can feature in existing accountability regimes and policies.
- Create educational policies which focus on valuing collective, equitable action and positive problem solving.
- Initiate a co-ordinated review involving teachers and students of secondary school curricula across the UK.
- This will identify ways to foreground and value sustainability regardless of the subjects students elect to study.

CCCSE foregrounding voices of children and young people

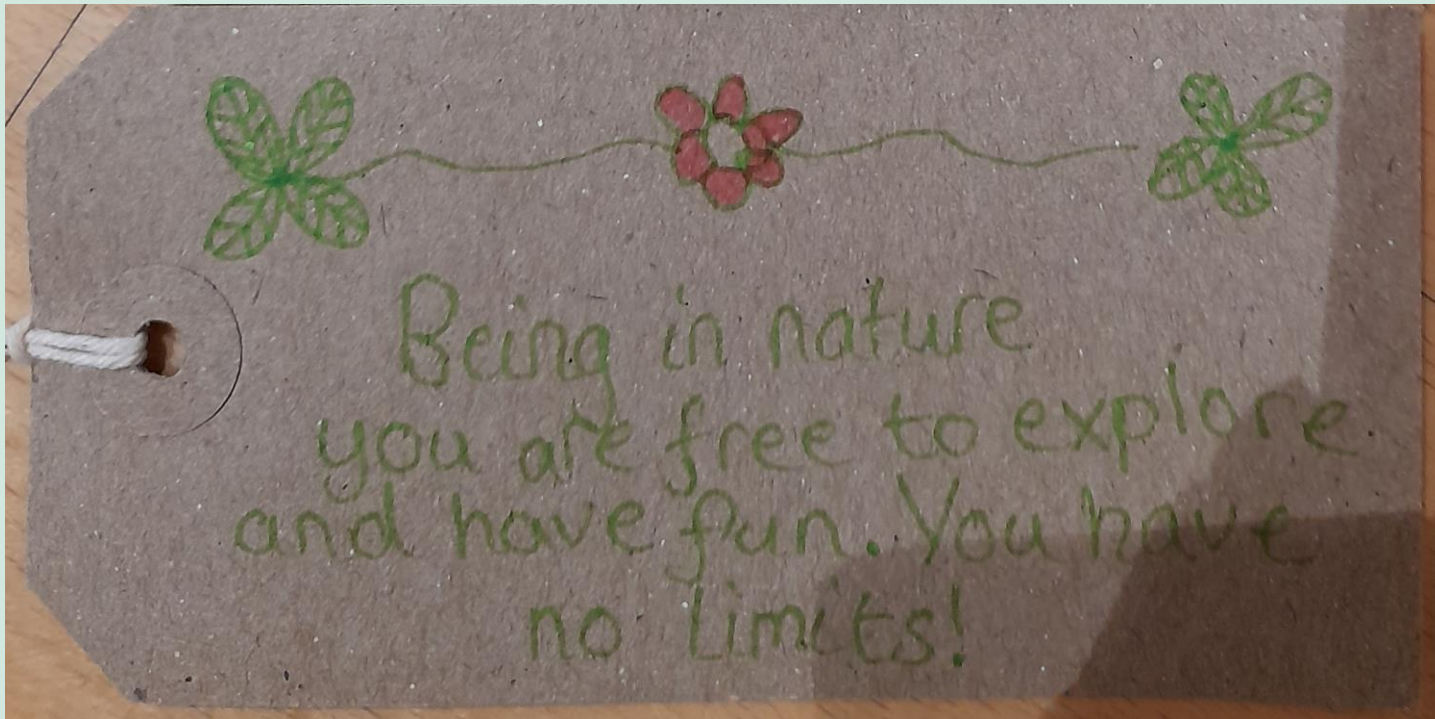

- Strategy development:
 - Public First research
 - Youth Panel
- Co-constructing research:
 - Focus groups

“It’s quite obvious to see young people often speak up about it more than older people.”

“I think a lot of young people are aware, ... but a lot of the time, it just feels out of your control. We’re not the policymakers, we can’t stop the big corporations that contribute more to the crisis than we do in our whole lives. It just feels disproportionate.”

Listening to the children...

'It can be a bit depressing...we need more positive stuff, we need to have hope.'
